Traditional typography manipulation:

Combining the computer with traditional techniques uses the potential of both worlds for maximum impact. Your aim is to use traditional techniques to enhance computer generated typography.

Objectives:

- Print out the word **typography** ten times using your selected font (don't deviate from this font from now on)
- Use traditional methods to change each word using (i.e. paint, scissors, paint etc)
- Scan in changed words

Try:

- Cutting the word up and then putting it back together again
- Crumpling it up and then flattening it
- Use pen to add details
- Use tip-ex or whitener to rub bits off
- Use white pen to draw patterns over the top
- Use gel pens to add decorations
- Tear it and put it back together again
- Use tracing paper to copy it out using pencil
- Create a stencil and spray it
